### Part One ((Reading Comprehension))

Read the following text then answer the questions

Mark Stubbs and his team wanted to be the fastest to row across the Atlantic from Canada to Britain. By 6:00 pm on 8th August 2004, after 40 days and 3,000 kilometres, they had nearly done it: their GPS showed they were just 450 kilometres from land. But that night, there was a terrible storm and at 2:30 am, a huge wave destroyed their boat and threw them into the sea.

Luckily, they managed to save a small life raft, a satellite phone and their GPS. They climbed into the raft and they used the GPS to find their position. Then they called for help. With the GPS information, a ship found them at 6:30 am. Soon, the men were climbing the side to safety. GPS technology had saved their lives. GPS uses a network of satellites. These orbit Earth at 19,300 kph and the GPS equipment on the ground can always 'see' three or more. It measures its distance from each and from this works out its exact position

1- what was the aim of Mark and his team?

-----

2- Why does GPS equipment need to 'see' at least three satellites in order to work?

-----

3- What three things they managed to save from the sinking boat?

-----

4- The underlined pronoun(it) Line 3 refers to -----

5 – True or False

a-A huge wave destroyed Stubbs's boat at 3:30 am .....

b- The route of their journey was from Britain to Canada .....

c- GPS uses a network of satellites that orbit Earth .....

d- The team failed to make a record .....

6- The abbreviation (GPS) stands for

-----

7- How many kilometers they were when the storm began?

-----

8- Give a word from the text that means

a-..... go round

b- ..... global positioning system

9- But that night , there was a terrible .....

Which night the writer means?-----

10- Say what the underlined phrase refers to

Soon , the men were climbing the side to safety -----

## Part Two: Vocabulary
